World Association against Infection in Orthopaedics and Trauma

MISSION

WAIOT has the mission of bringing together professionals from various disciplines and from all over the world interested in musculoskeletal, biofilm and implant-related infections.

W is aimed at increasing and sharing the knowledge on musculoskeletal infections and supports research, education and training throughout the world.

W is open to a cooperation with national and international institutions and societies focused on musculoskeletal infections.

W is aimed at raising new awareness in institutions and all the stakeholders about the social and economical impact of bone and joint infections.
